

Project Development Phase Delivery of Sprint-4

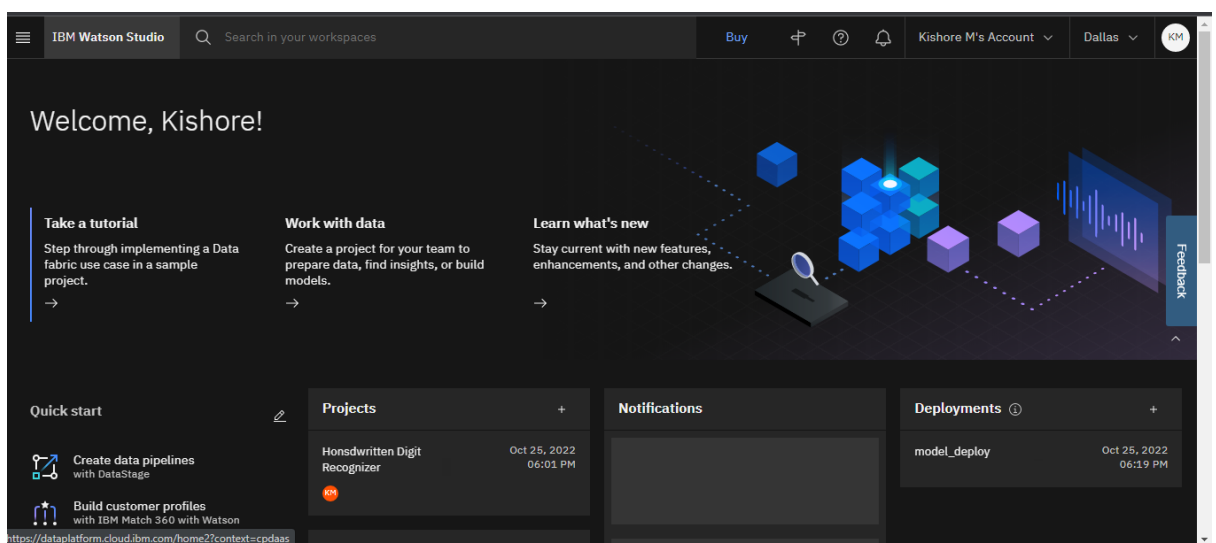

Date	15.11.2022
Team ID	PNT2022TMID53601
Project Name	Project - A Novel Method for Handwritten Digit Recognition System

Create IBM Cloud Account

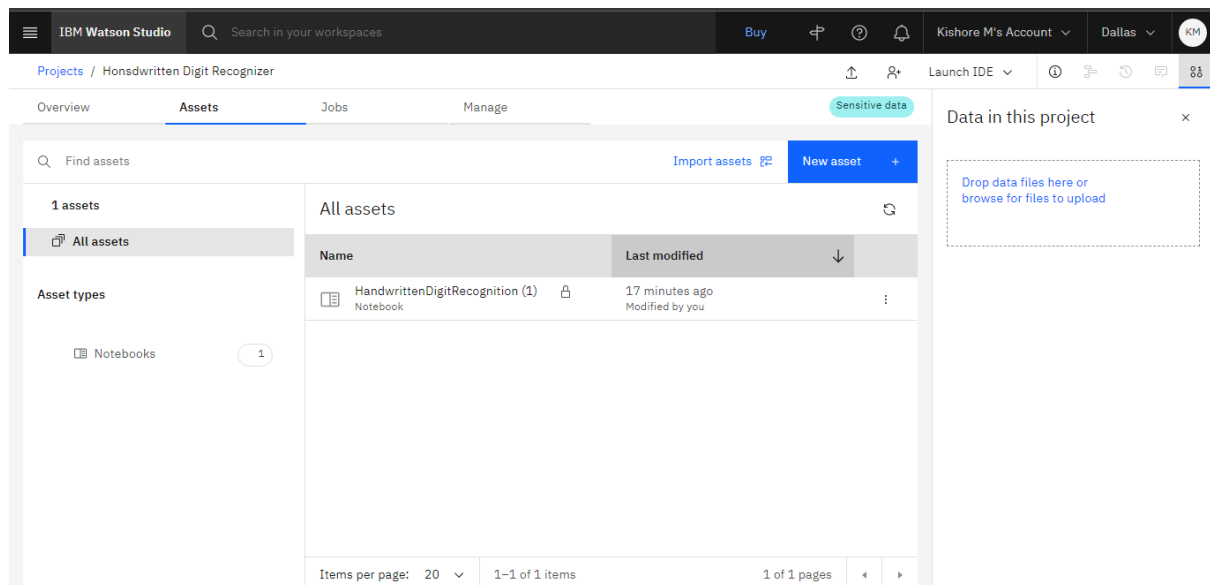

1. Login into the IBM Cloud Account using your credentials.

2. Go to your project. If you don't have any project create a new project

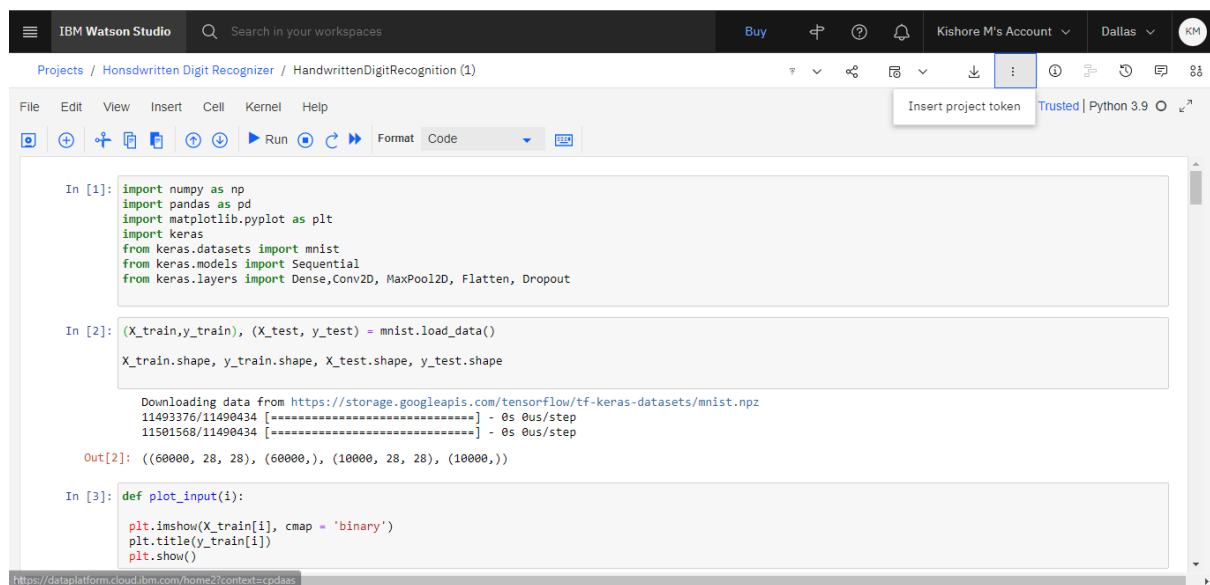

3. Inside the project upload a new **Jupyter Notebook** file as an asset and click the file.

The screenshot shows the IBM Watson Studio interface. The top navigation bar includes the IBM Watson Studio logo, a search bar, and user account information. The main content area is divided into tabs: Overview, Assets, Jobs, and Manage. The 'Assets' tab is active, displaying a list of assets. On the left, there is a sidebar with 'Find assets' and 'Asset types' (Notebooks). The main area shows 'All assets' with a table listing one asset: 'HandwrittenDigitRecognition (1)' (Notebook), last modified 17 minutes ago. A 'New asset' button is visible in the top right. A 'Data in this project' panel on the right shows a dashed box for uploading files.

Name	Last modified
HandwrittenDigitRecognition (1) Notebook	17 minutes ago Modified by you

4. Now, perform the model training by running the codes of the Jupyter notebook file

The screenshot shows the IBM Watson Studio Jupyter Notebook interface. The top navigation bar includes the IBM Watson Studio logo, a search bar, and user account information. The main content area is divided into tabs: Overview, Assets, Jobs, and Manage. The 'Assets' tab is active, displaying a list of assets. On the left, there is a sidebar with 'Find assets' and 'Asset types' (Notebooks). The main area shows 'All assets' with a table listing one asset: 'HandwrittenDigitRecognition (1)' (Notebook), last modified 17 minutes ago. A 'New asset' button is visible in the top right. A 'Data in this project' panel on the right shows a dashed box for uploading files.

```
